

From the manufacturer of the world's best commercial humidifier...

n e p t r o n i c
SKR Residential Humidifier

(Patent Pending)

Simply the Best!

- SUPERIOR QUALITY
- PURE, STERILE STEAM
- ENVIRONMENTALLY FRIENDLY
- ECONOMICAL TO OPERATE
- SIMPLE, RELIABLE & EFFICIENT

PRESERVE HEALTH & COMFORT
SAFEGUARD VALUABLE OBJECTS
ELIMINATE STATIC ELECTRICITY

A high quality humidifier in a home is not a luxury, but a necessity.

It is a fact that people spend the greater part of their daily life at home. Therefore, it stands to reason that their **health and comfort will depend to a great degree on the environmental conditions** within the home. One of the most important of these conditions is humidity.

Low humidity causes:

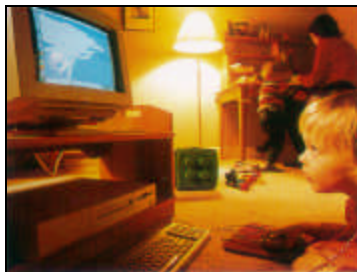

- Dry skin & sinuses
- Scratchy throats & bleeding noses

Humidifying a home will:

- ✓ Protect the body from winter illness
- ✓ Create healthier, more comfortable living environment

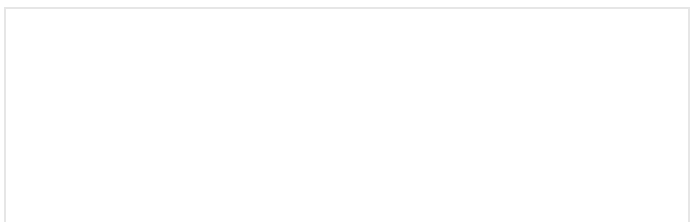

Warm dry air cools the skin surface, making a room feel cold. The natural reaction is to "turn up the thermostat", when in fact, the solution is to humidify the air. Increasing the humidity level in a home makes the air feel warmer at lower temperatures, which means that thermostats can be "turned down". The result is a warmer and more comfortable environment while substantially reducing heating costs!

Hardwood floors, antique furniture, works of art, musical instruments, books, precious heirlooms etc. may crack, warp, or peel in a dry environment. Proper humidity levels will arrest these symptoms and help protect these investments indefinitely.

Humidity control **eliminates static electricity**, which causes annoying shocks and can damage VCR's, computers and other expensive electronic devices.

A state-of-the-art humidifier improves indoor air quality, enhances a families' health and comfort while protecting valuable objects in a home!

The **Neptronic SKR** uses proven electric immersion element technology to generate **pure and sterile steam** using any type of cold tap water. It does not use bacteria accumulating, difficult to maintain, wet pads or foam in the air ducts. Steam is produced in a **permanent stainless steel chamber** and distributed into the air duct. Mineral deposits are collected in the chamber, which is easily removed and re-installed for rapid servicing.

The **Neptronic SKR** Humidifier provides **simple, efficient and reliable** operation with its state-of-the-art, user-friendly micro-processor control and electronic humidity sensors. Using the factory assembled telephone cables with jacks eliminates control wiring errors.

Features and components found in our patented SK300 Series commercial humidifiers have been incorporated in the **Neptronic SKR** to provide the most dependable humidifier system on the market.

- No polluting, non-reusable plastic bottles or cylinders to throw away!
- Economical to operate
- Environmentally friendly

SAVE MONEY!

The **Neptronic SKR** Humidifier includes a permanent, reusable stainless steel chamber instead of a disposable plastic bottle which has to be replaced at least

once a year, resulting in thousands of dollars of savings. These savings will more than pay for the initial cost of the humidifier. **Neptronic Humidifiers - Simply the Best!**

SKR HUMIDIFIER SPECIFICATIONS			
MODEL	CASA	VILLA	CHATEAU
CAPACITY	4.5 lb/hr (2.05 kg/hr)	7.5 lb/hr (3.41kg/hr)	12 lb/hr (5.45 kg/hr)
POWER	1.4 Kw	2.5 Kw	4 Kw
