

The AX/SMR General Information

DSP-Monoxivent creates smart and innovative solutions with a premier line of Emergency Vehicle Exhaust Systems.

Our AX product line offers exhaust extraction systems specifically designed to meet a variety of applications. Whether you need an automatic release system or a manual release system, we can meet your requirements and fit your budget.

The AX product line includes a Pneumatic Track System (AX-PT), a Pneumatic Rail System (AX-PR), and a Vertical Stack System (AX-VS).

Monoxivent also offers a cost-effective solution with the Stationary Mechanical Release System (SMR).

The AX is designed and manufactured to remove emergency vehicle exhaust fumes out of vehicle bays safely and efficiently. The removal of these toxic fumes; help preserve the air quality throughout the firehouse.

The system is easy to use and low maintenance. The versatility of the AX ensures that all fire stations and vehicles are accommodated. Monoxivent offers the flexibility to adapt to any size tailpipe and vehicle.

Additional information - including installation instructions and specifications are available by contacting DSP-Monoxivent directly at 309-794-1000 or via e-mail at dsp@dsp-monoxivent.com.
