Today, most people involved in the HVAC industry around the world are familiar with Nailor Industries Inc. and our comprehensive line of Air Distribution, Air Control and Air Terminal Unit products. However, many may not know that the company had humble beginnings.

The company commenced operations at a small facility in Toronto, Canada manufacturing a single air control device. Michael T. Nailor (President and CEO) started with the founding principle that the company would be customer focused and service orientated, dedicated to fulfilling the need for high quality, competitively priced products, delivered to our customers on schedule.

Nailor management has maintained strict adherence to the 'Superior Customer Service' philosophy for more than 30 years and as a result, the company has been rewarded with a continually increasing demand for our products. An ever expanding product offering includes air control and fire/smoke dampers, a complete line of grilles, registers and diffusers as well as fan coil units, fan powered terminal units, silencers, and electric duct heaters that exceed industry standard design and performance specifications.

Recently, Nailor International Group has expanded their already outstanding repertoire of companies with Thermal Corporation – manufacturers of custom air handling equipment, and Manufactured Air Products – a complete line of top quality air distribution and air control products that are available through stocking wholesalers across North America.

Today, with Group International Headquarters in Houston, Texas, the company has ten manufacturing plants totaling over 600,000 square feet strategically located in three countries to service the North American, European, Middle Eastern and Asian Pacific markets. An international distribution network of representatives in most major cities work together to not only meet but exceed the expectations of clients, engineers and customers around the world.

As a private company, employing a staff of dedicated professionals, Nailor Industries Inc. is prepared to set new benchmarks for service and quality as the company continues to grow and remain the source for your . . .

"Complete Air Control and Distribution Solutions."
